

# Gilligan's Logic Puzzle

Just sit right back and you'll hear a tale  
 a tale of a fateful puzzle  
 just find their hue and what they eat  
 and then find what they guzzle!

The castaways were amazingly creative! Look at all the things they made with coconuts! I mean seriously: lavender paint? Use the clues below to determine the color of each hut, the food that the occupants ate, and their drink. The hut number will tell you what's important about each color, food, and drink. You'll end up with a one-word answer.

Treasure Hunt?

Huts		 1st	 2nd	 3rd	 4th
Color	mint				
	rose				
	lavender				
	cornflower				
Drink	beer				
	scotch				
	bourbon				
	frangelico				
Food	polenta				
	nachos				
	lamb				
	bananas				

- The person eating nachos lives directly next to the person eating bananas.
- There is one hut between the hut of the person eating lamb and the lavender hut.
- There are two huts between the lavender and mint hut.
- The person drinking frangelico lives to the right of the cornflower hut.
- The person in hut one drinks beer.
- There are two huts between the person eating nachos and the person drinking scotch.
